IMAP's IT-Services Report

We are pleased to release the **IMAP IT-Services Sector Report for Q3 2023**. This sector overview provides insights into the investment activities of private equity investors as well as the valuation and share price development of listed companies and specific M&A dynamics

- Our assessment of **private equity investments in IT-Services companies** in the DACH region indicates a sustained high level of M&A activity with **12 deals YTD** across various **subsectors**. The report analyzes **71 investments in IT-Services companies** since 2014. In general, **companies have experienced strong demand** in recent years. **Investors are pursuing buy-and-build strategies** for their platforms and have carried out a **large number of transactions** in the **lower mid-market**
- We analyzed the **performance and valuation of listed IT-Services companies**, by defining the **subsectors System Integration & Consulting** (divided by region), **Marketing Services**, and **Digital Engineering**. The subsectors show a heterogeneous LTM stock performance as of September 2023. Similarly, valuation levels vary across subsectors
- The report includes an analysis of the **number of transactions** and **transaction volumes** in the **German and European** (excluding German market) IT-Services market. The evaluation of **transaction-based valuations** in Europe in 2023 is in line with previous years

Introduction to the PE IT-Services Market in German Speaking Europe

Strong investment activity in recent years across all company sizes and subsectors

Introduction

- Our analysis comprises **71 IT-Services companies** and **49 financial investors** with activity in Germany, Austria, and Switzerland
- IT-Services companies have experienced **high demand** in the last years, and we observed **55 transactions since 2020**, with deal activity peaking in 2021 with 17 transactions
- Between 2020 and 2023, **56 deals** were of **primary nature** (Entrepreneur to PE) and **15 deals** of **secondary nature** (PE to PE)
- A growing number of investors diversify their IT-Services portfolios. **c. 30% of investors** have acquired **2 or more IT-Services companies**
- Funds such as Ufenau, Auctus, Waterland, Carlyle, Deutsche Beteiligungs AG, and Nord Holding have built **substantial portfolios**
- Around **38%** (59%) of the analyzed platforms generate **annual revenues of more than € 100m** (€ 50m)
- c. 60%** of the analyzed platforms **employ more than 250 people** and roughly 23% employ more than 1,000 people

Platforms by Shareholder

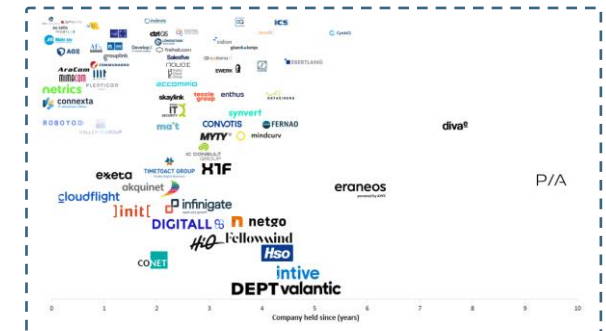

- We observe investments of funds in companies of all sizes and in all phases
- A few investors such as Ufenau, Auctus, and Waterland show exceptionally high activity in acquiring IT-Services assets

Platforms by Type of Service

- Investors show interest in a broad range of different IT-Services
- Highest M&A activity can be observed with companies offering diversified IT-Services, followed by companies active in customized software development

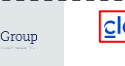

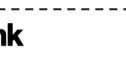

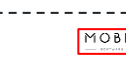

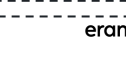

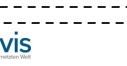

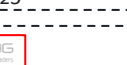

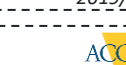

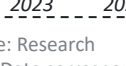

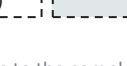

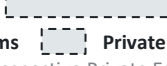

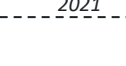

Platforms by Holding Period

- The holding periods of the analyzed companies range from just acquired to up to 10 years
- On average the holding period is 2-4 years

Current Snapshot of the DACH IT-Services Private Equity Landscape

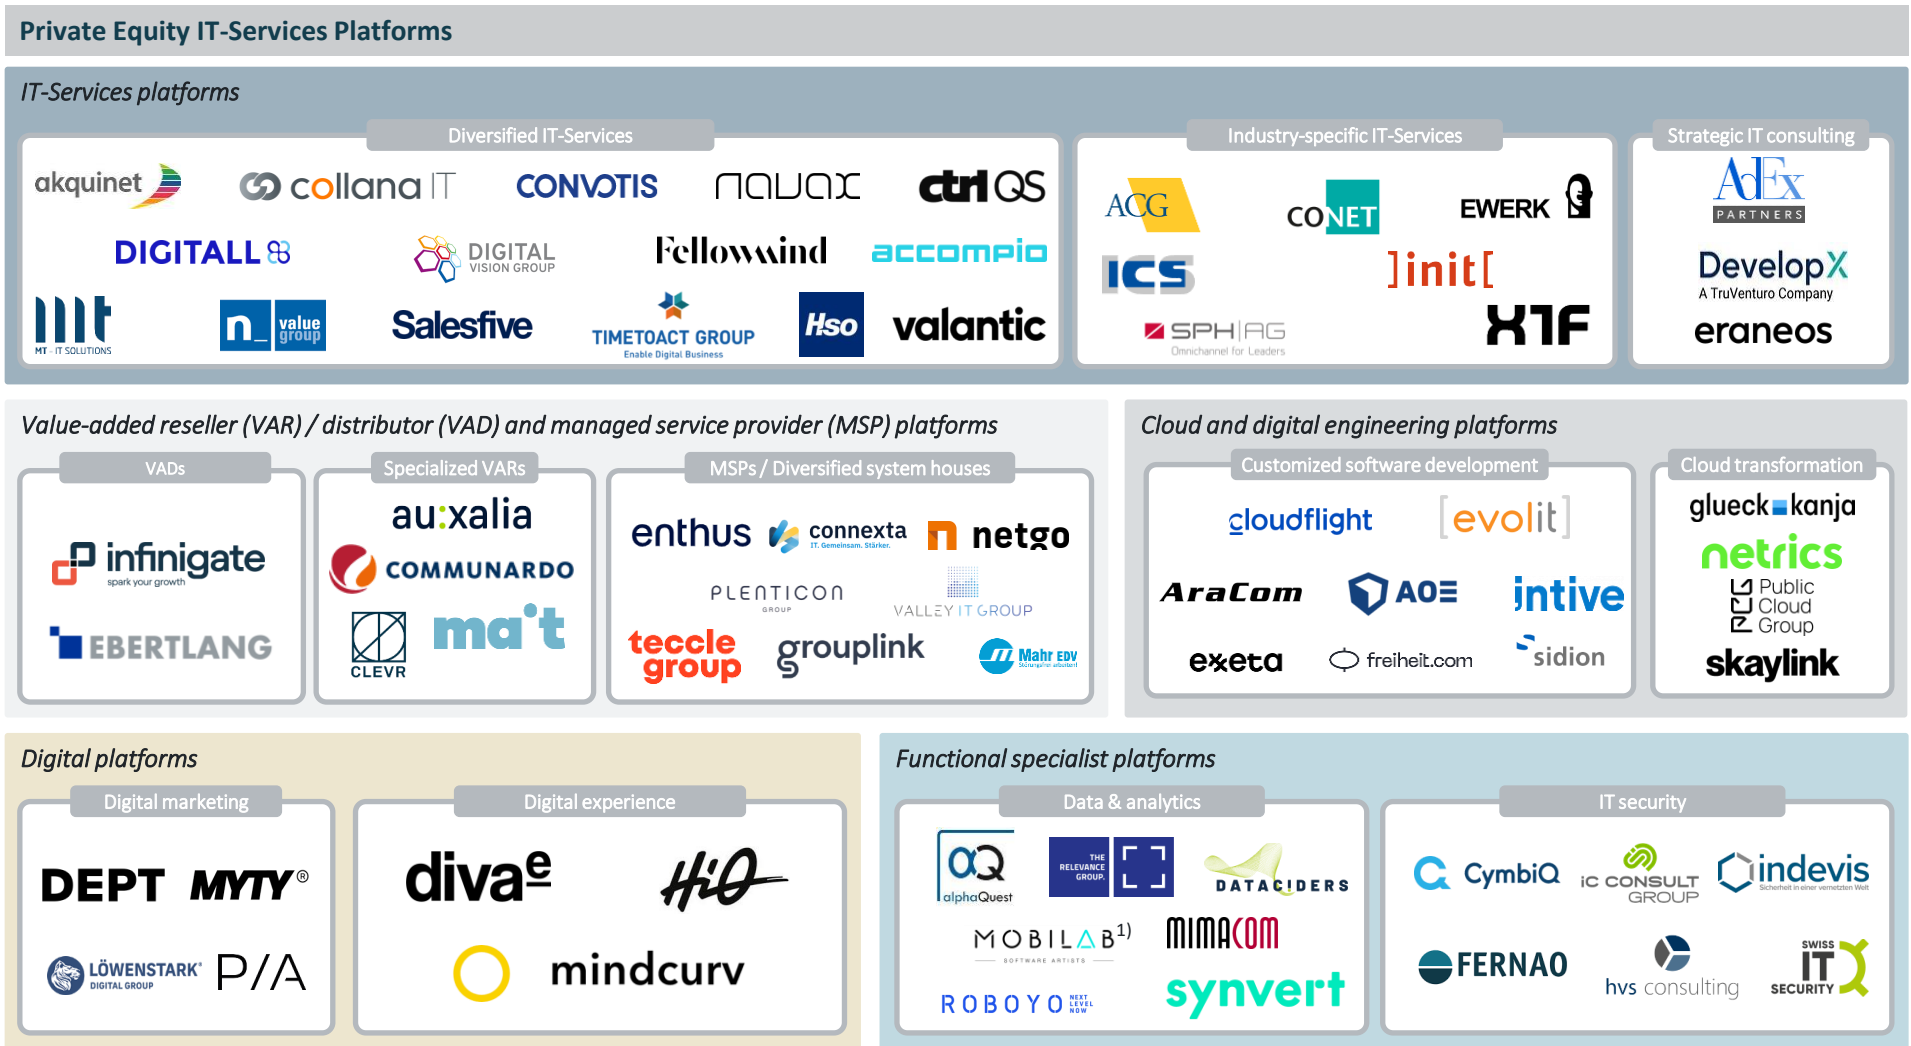

We observe strong activity from Private Equity investors, creating substantial buy-and-build IT-Services platforms

Introduction and Executive Summary on the IT-Services Market

Overview of the IT-Services market in Germany and Europe

Executive Summary

Analysis on M&A activity in 2023 compared to the historic development in Germany and Europe:

- Following a peak during the COVID-19 pandemic, the number of transactions in Germany continued to return to a sustainable level in H1 2023
- In Germany, 171 transactions with a deal value of EUR 4bn were closed in H1 23. The deal value remained stable compared to H2 22 and the deal count decreased slightly compared to the prior period, indicating an increase in average transaction volumes
- In Europe (excl. Germany), 1157 transactions with a deal value of EUR 49bn were closed in H1 23, with both deal value and deal count increasing moderately compared to the prior period
- With 13.4x EV/EBITDA and 2.1x EV/Revenue, Q3 23 transaction-based valuations in Europe are in line with valuations of previous periods

Stock performance and valuation analyses of selected segments of publicly listed IT-Services companies (segmentation details on the right):

- During the last 12 months, the two segments with the strongest stock performance were SI & Consulting North America (+10%) and Marketing Services (+8%)
- In Q3 23, SI & Consulting Asia was trading at the highest EV/Revenue multiple (3.2x) and the highest EV/EBITDA multiple (17.2x) and was the subsector with both the highest profitability with EBITDA margins in excess of 18% and the highest revenue growth with +12%
- The EV/EBITDA valuation of the subsector Digital Engineering encountered a steep decline since its high in Q1 22
- The R²-coefficient of the regression of single stock's EV/EBITDA against their respective performance in terms of revenue growth and EBITDA-margin is 0.38 and thus shows a moderately positive connection between valuation and stock performance

Segmentation of Publ. Listed IT-Services Companies

This industry report categorizes the IT-Services landscape of listed companies into the following subsectors:

System Integration (SI) & Consulting:

Companies providing services such as optimizing companies' technology infrastructure, designing and implementing integrated systems, and providing advice on IT solutions. The report divides SI & Consulting companies into North American, European and Asian due to their end markets and different delivery models

Marketing Services: Firms offering a range of marketing services, including market research, advertising, branding, and digital marketing, to help businesses promote their products or services and reach their target audience effectively

Digital Engineering: Firms utilizing advanced technology and data-driven processes to design and optimize complex systems and products, enhancing efficiency and innovation in industries such as aerospace, automotive, and manufacturing

A person in a dark blue suit and tie is shown from the chest up, holding a transparent digital tablet. The tablet displays a complex, futuristic interface with various icons and data visualizations. The background is a dark blue gradient with faint, glowing lines and shapes. The word "IMAP" is prominently displayed in the center of the image in a large, white, serif font.
